

SUMMER CAMPS

Camp Delicious

(Ages 11-14)

Cost: \$200

When: June 4-8
8:30-11:30 AM

This camp is perfect for the future chef or child interested in learning his/her way around the kitchen. Campers will learn basic culinary skills as they create edible works of art. Each camper will receive and use their very own measuring, and mixing utensils and will decorate their own apron. Cooking supplies and aprons are theirs to take home at the end of the week. Limited to 20 students.

Construction Camp

(Ages 11-14)

Cost: \$120 (lunch provided)

When: June 11-15, 2018
9:00 AM-3:00 PM

This five-day camp will include instruction from experts in ALL THINGS

CONSTRUCTION including: an introduction to construction safety, hand tools, measuring, cutting, framing, roofing, electrical, painting and finishing. Plus, campers will look into construction industry educational and career options.

Students will work together each day to build items that will be donated to local families and they will also construct an individual project for them to take home.

Kids Can Code!

(Ages 7-10)

Cost: \$150

When: June 11-15
8:30-11:30 AM or
12:30-3:30 PM

Ozobots and code.org set the stage for this exciting learning experience. Kids will be introduced to basic coding using online programs and robots. Kids will collaborate to problem solve in a computer science environment. When students leave on Friday they will have an account with code.org that they can continue to access after the camp as well as their very own Ozobot robot to program this summer.

Limited to 16 students each.

Rockin' Robots STEAM Academy

***THIS CAMP IS FOR GIRLS ONLY**

(Ages 9-13)

Cost: \$150

When: June 11-15, 2018
8:30-11:30 AM

Rockin' Robots will tap into student creativity and empower students to learn new skills as they create their own basic robots, learn how they work, and gain the programming fundamentals to create their own program to create and control both virtual and real-world characters.

The Rockin' Robots STEAM Academy is designed to take the novice maker and programmer through a series of experiences over a five-day course that will result in a basic understanding of both the hardware (circuits) and software (coding) to bring projects to life and leave students with a sense of accomplishment and pride as they leave with their own creations and leave you with the supplies and resources to continue to impact student learning throughout the year.

Hummingbird Robotics

(Ages 11-14)

Cost: \$150 (attend both GAMING & ROBOTICS for \$250!)

When: June 18-22, 2018
8:30-11:30 AM

This camp is designed for students interested in the field of robotics. The camp will look at the history and evolution of robotics, its use in today's world of work/play, and potential for the future.

Campers will use the Hummingbird Robotics Kit, basic crafting materials, and their own imagination to create and program a fully operational robot.

Limited to 25 students.

REGISTER»

Gaming Engineers!

(Ages 11-14)

Cost: \$150 (attend both GAMING and ROBOTICS for \$250!)

When: June 18-22, 2018
12:30-3:30 PM

"Gaming" doesn't only mean "video games;" Gamers also play board games, card games, simulations, and participate in interactive stories. This camp breaks down the game design process step-by-step down to the fundamentals of game design. A final project will include building, play testing, and revising their own original game. Gamestar Mechanic uses

fun, game-based quests and courses to help you learn game design and make your own video games!

Limited to 25 students.
